

Name of insured: _____ Policy Number: _____

Civic Location: _____

Was the wood stove professionally installed: YES NO If so, by whom: _____

Where is the stove located within the dwelling: _____ OR Is the stove located in an outbuilding: YES

What is the name of the Manufacturer of the stove: _____

What is the model name or number shown on the appliance label: _____

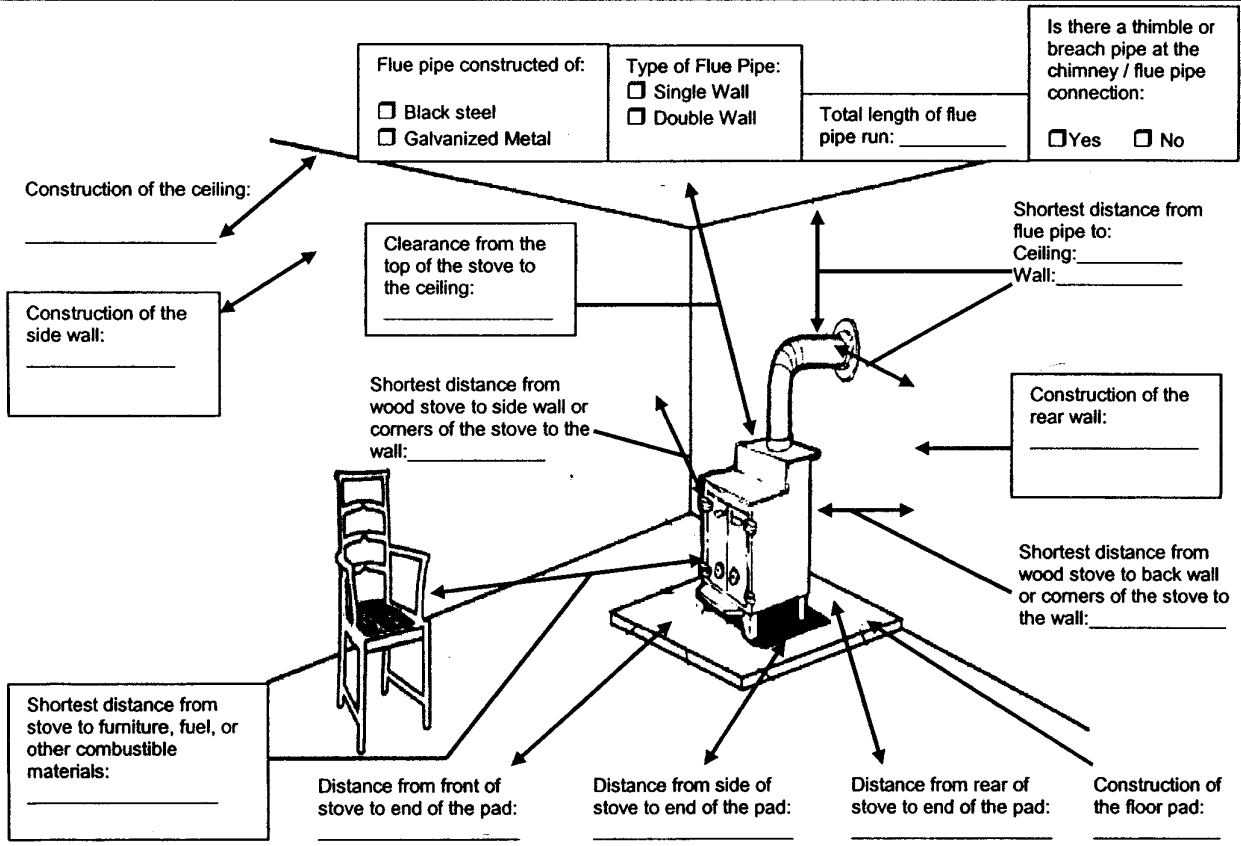

Please indicate what certification logo is printed on the label: ULC CSA W/H ITS

Please indicate directly below the manufacturer's required clearances that are listed on the label of the stove:

Front/Load Door _____ Top _____ Rear _____ Sides _____ Corner _____

1. If the stove is shielded, then please indicate on what side(s) it is shielded: Sides _____ Bottom _____ Rear _____
2. If there is no shielding on the stove, then is it a manufactured double walled stove: YES or NO
3. Any cracks, defects, rust or discoloration seen on the unit: YES NO If so what & where: _____
4. Does the flue pipe angle upward from the unit to chimney: YES NO
5. Are there more than two 90° flue pipe elbows: YES NO
6. Does the flue pipe pass through floors or ceilings: YES NO
7. Are there creosote stains above or below the flue pipe connection to the chimney: YES NO
8. Do the crimped ends (beveled) of the flue pipe face the stove: YES NO
9. Does each joint of the flue pipe assembly have at least three metal screws installed: YES NO
10. Does another heating appliance share the same chimney flue as the wood stove: YES NO
 If it does, are the flue pipes of both appliances connected together in the shape of a "T" or a "Y": YES NO
 If more than one unit shares the same chimney flue, in what order do the flue pipes enter the chimney starting from the bottom: _____
11. What type of chimney does the wood stove use: Wood Rated Metal Brick Other (please describe): _____
12. If the chimney is brick, then what type of liner is installed in the chimney: Clay Metal None
13. Where the chimney rises above the roofline, does it do so by at least three feet: YES NO
14. As the chimney relates to the roof surface or any attachments such as dormers within 10' feet of it, does it rise an additional 2' until the top of the chimney has a clearance of at least 10' from the roof surface or any attachments: YES NO
15. Are there any visible defects noted in the chimney such as: Missing mortar Missing bricks Dents in metal chimney
16. How often each year is the chimney cleaned: _____ When was the last time that the chimney was cleaned: _____
 Who cleans it: _____ Is that person a professional chimney sweep: YES NO
17. How many cords of wood are used annually: _____ Is the stove used on a daily basis: YES NO
 If the stove is used on a daily basis, then how many hours on average per day is it used: _____

18. Where is the wood supply stored at: Outside Inside (i.e. basement - outbuilding) _____
 How many cords are stored there: _____
19. When removing the ashes from the stove what are they stored in (i.e. metal container, plastic garbage bag, cardboard box) _____
 and after they are removed where are they stored (i.e. in the garage, in a detached outbuilding, under the outside deck) _____
20. What other fuel sources are there in the home: Oil Propane Electricity
 Other (Please describe the other type of fuel) _____
 Which of these fuel sources is considered to be the primary heat source: _____
21. Is there any type of shielding installed on the rear and or sidewalls next to the stove: YES NO
22. Is the shield made of: Sheet metal Ceramic Brick Or Something else (describe): _____
23. Is there a one-inch airspace between shield and combustible held in place with non-combustible spacers: YES NO
24. Does the shield rise at least 20" above the top of the stove: YES NO
25. If the shield rises all the way up the wall, does it stop at least 3" from where it meets the ceiling: YES NO
26. Does the shield extend from the rear of stove on either side by at least 18": YES NO
27. Does the shield stop no closer to the floor than 1" but yet no higher than 3": YES NO

COMPLETED BY _____
